

## **Implementing an automated manufacturing execution system for LUKOIL Overseas Holding in KarakudukMunai LLP**

<b>Sector:</b>	Oil and gas
<b>Region:</b>	Kazakhstan
<b>Client:</b>	KarakudukMunai LLP
<b>Task:</b>	Automation of a manufacturing execution system.
<b>Result:</b>	KarakudukMunai personnel find the system very useful for their everyday activities, as it allows them to quickly view historic information and retrospectively analyze the production process across the entire field.
<b>Review:</b>	<p>"ITPS* specialists demonstrated a high level of oil and gas industry competency and expertise at every step of the project; this coupled with their excellent ability to work with people and clearly explain information to the system end users ensured success of the project. The project was implemented within the specified timeframe and to the required quality standard through coordinated efforts from ITPS* specialists, thus making it possible to use the system in other oil production companies."</p> <p>(Stepan Gurzhy, CEO of KarakudukMunai LLP)</p> <p>* The project was implemented by Parma Telecom (ITPS)</p> <p>** The material is available in Russian version only</p>
