

## Improving the efficiency of production processes at the West Qurna-2 field with operational analytics

- Sector:** Oil and gas
- Client:** LUKOIL Overseas
- Task:**
1. Roll out prompt collection and analysis of production data to ensure operational control and management, improve productivity and support medium- and long-term planning.
  2. Find and implement a scalable solution to process growing data volumes which should meet the requirements of the Unified Service Center (Dubai) as well as Iraqi laws and regulations.
- Result:**
- Production process monitoring 24/7
  - 50% decrease in backlogs vs. plan
  - Oil production losses reduced
  - Decision-making timeframe cut two-fold
- \*\* The material is available in Russian version only
- Line of activity:** Production automation solutions
