

Automating the business process for procurement of products and services in Zhaikmunai LLP

Sector:	Oil and gas
Region:	Kazakhstan
Client:	Zhaikmunai LLP
Task:	Ensuring continuous production process through unification, centralization and improvement of production efficiency of the company's procurement processes as well as enhancing the monitoring and quality control of procurement processes, stock and material flow management.
Result:	<ul style="list-style-type: none">• Completed automation of the products and services procurement business process• Increasing transparency of the procurement process• Integration of consumer requirements in the procurement process. The owners have real-time access to both status reports for bids and stocks• Creation of a catalogue of activities and services; introduction of a service accounting approach based on a catalogue rather than materials directory• Implemented processes of registering completion certificates and their approval in the system• Real-time notification of system users by email of documents received for review (requisitions, orders, and service schedules), reducing the sign-off period.
