

SAP implementation project for Turgay-Petroleum JSC on the basis of ISU LOKhL

Sector:	Oil and gas
Region:	Kazakhstan
Client:	Turgay-Petroleum JSC
Task:	To improve the performance of the TURGAY-PETROLEUM JSC and to provide the management with a reliable tool for modern management decision making on the basis of full-scale analysis of the enterprise activity.
Result:	<p>At present 200 users are working in the system: those of the headquarters in Kyzylorda, Almaty office, Kumkol field oil & gas extraction shop.</p> <p>The existing business processes were brought in compliance with the SAP standards and best global practices. A common information space for enterprise employees was created, releasing them from the need of multiple input of the same information and manual documentation creation. Now the company management receives information on the enterprise activity in the real time mode to make prompt management decisions.</p>
Review:	<p>"We express our gratitude to the Parma-Telecom LLC for their professionalism shown in the work of their consultants, individual approach in the resolution of specific issues, the ability to find the best compromise solutions in complex situations, which finally ensured the implementation of the project within the established timeframes. We are always ready to involve Parma-Telecom LLC specialists in the implementation of projects of different orientation and complexity."</p> <p>Chief Economic and Financial Officer of TURGAY-PETROLEUM, Kamalidin Bakytzhan Bekzadauly.</p> <p>* The project was implemented by the Parma-Telecom company (ITPS Group) ** The material is available in Russian version only</p>
