

## Implementation of the Investment Project Management functionality based on SAP ERP for the United Metallurgical Company CJSC

<b>Sector:</b>	Metallurgy
<b>Region:</b>	Russia
<b>Client:</b>	OMK
<b>Task:</b>	To improve the enterprise manageability, the performance of the financial and economic activity, sales, logistics, production planning, investments and capital construction projects management by implementing SAP ERP.
<b>Result:</b>	The automation of the investment projects management process will let the enterprises of the OMK CJSC plan their investment activities: plan the timeframes, costs, needs for materials and equipment, automatically create purchase requests. In terms of project execution it will allow tracking the project execution status, the receipt of equipment and materials, controlling costs for capital construction units, bringing fixed assets into production.
<b>Review:</b>	<p>"Our company expresses its gratitude to the Parma-Telecom LLC for the high level of professionalism, good results, benevolence to the Client and recommends it for the resolution of SAP-based management systems implementation issues."</p> <p>Roshchin Yury Vladimirovich, Chief Information Officer of OMK CJSC.</p> <p>* The project was implemented by the Parma-Telecom company (ITPS Group) ** The material is available in Russian version only</p>
