

Developing a warehouse management system based on SAP LE-WM using an SAP Syclo mobile solution

Sector: Oil and gas

Region: Iraq

Client: LUKOIL

Result:

- Creation of an effective automated warehouse accounting system
- Significant reduction in the material receipt process
- Reduction in warehouse operation errors
- Increased accuracy of material location and quantity data at the warehouse
- Reduction in the duration of warehouse operations

Commercial operation of the system started in 2014.

Partners: SAP
