

Managing reference data in LUKOIL Mid-East Ltd.

Sector:	Oil and gas
Region:	Iraq
Client:	LUKOIL
Task:	Implementing functionalities used to optimize business processes for maintaining equipment inventories, spare parts and material master data as well as standards for maintenance and repair in SAP ERP as part of the "Managing Reference Data" project for LUKOIL Mid-East Ltd.
Result:	<p>The implemented solutions helped users of LUKOIL Mid-East Ltd. to improve the quality of data cataloguing for equipment units, spare parts, materials and MRO standards. In addition, they reduced time spent on decision-making with regard to amending master data.</p> <p>** The material is available in Russian version only</p>
Review:	<p>"Thanks to the project implemented at LUKOIL Mid-East Ltd., the quality of reference manuals for equipment, spare parts, materials and maintenance standards was significantly improved. In addition, the time for reference materials' approvals has decreased." Asset Integrity CMMS Engineer, A. Semenov</p>
